 - o API: REST.
 - o Continues Integration: Jenkins.
- **Platform knowledge:** Windows 7 and 10, Mac OS, Linux Distribution (Opensuse, SLED).
- **Security tools:** Nessus, Zap, Sql Map.
- **Domain:** EFSS, CRM.

Organizational Experience:

- **Company:** Micro Focus.
- **Year:** July 2014 – Till date.
- **Product/Team:** Filr.
- **Designation:** Senior Software Engineer.
- **Project experience:** Sept 2015 – till date.
- **Team Size:** 14 Members.
- **Domain:** EFSS.
- **Description:**
 - o Micro Focus Filr provides file access and sharing, and lets users access their home directories and network folders from desktops, mobile devices, and the Web. Users can also synchronize their files to their PC or Mac. Changes that they make to downloaded copies are kept in sync with the originals on their network file servers. And finally, users can also share files internally and externally, and those with the share can collaborate with each other by commenting on the files.
- **Roles and Responsibilities:**
 - o **Leading an automation team** having 4 members.
 - o Make new Test, Review and execute.
 - o Do **Functional, Regression, Adhoc, NCT** etc.
 - o Automate new test-case, maintain and execute on build basis.
 - o Created and managing **continues integration** using **Jenkins**.
 - o Handle **UI, CLI** and **API** automation for multiple platforms (WEB, Windows, Mac Linux and REST).
 - o **Debug** automation code and **give fixes** in case of failure.
 - o Do **planning** and **review** for automation.

- o Own **Multiple features** end to end and complete automation.
 - o Managing Bugs in **Bugzilla**.
 - o Lead others in Debugging to narrow down the issue.
 - o **Subject Matter Expert (POC)** of product **Mac Client** and **Automation**.
- **Product/Team:** OES.
 - **Designation:** Software Engineer.
 - **Project experience:** 1 years.
 - **Team Size:** 23 Members.
 - **Domain:** EFSS.
 - **Description:**
 - o Open Enterprise Server (OES) is a server operating system designed for shared network resources and a virtualization-computing environment. It is a combination of NetWare and SUSE Linux enterprise server and can be installed like any of the two depending upon the installation. It is also known as OES-Linux and OES-Netware, when installed like Linux and NetWare respectively.
 - **Roles and Responsibilities:**
 - o Automation:
 - Automate new Test-cases in multiple platform like WEB, WINDOWS, MAC, and LINUX (SLED) using java.
 - Modify and Manage Automation framework and new code for different component.
 - Running and publishing results on daily builds.
 - Debug in case of any failures and give automation fixes.
 - o Own Features like:
 - Installation, Ifolder, IManager.
 - Filing Bugs.

Education:

- **Schooling and Graduation:**
 - o B.E form Takshshila institute of Engineering and Technology, Jabalpur, M.P, 2012.
